Risansi
INDUSTRIES LTD

40 years | 650 Sugar Mills | Across 15 Countries
90 Sugar/Distillery/Cogen/Refinery projects

Highflow
Progressing Cavity Pumps

ZERO Leak
Rota Pumps

Cost **Effective** **Quality** Solutions

Risansi INDUSTRIES LTD

MAJOR INDUSTRIES

SUGAR, DISTILLERY & REFINERY

Liquids Handled

Spent wash transfer, Slop transfer pumps for incinerator boilers, scum for liquor purification, sludge transfer, lagoon evacuation, effluent treatment, trolley mounted pumps for pit evacuation, long distance molasses transfer up to 3-5 kms., Flocculants dosing, Lime Sucrate, Phosphoric acid dosing, syrup, Grain, Massecuitte, Magma, Molasses and many more.

Spent Wash Transfer

Slop Transfer Pump for Incinerator Boilers

Scum for Liquor Purification

Sludge Transfer

Lagoon Evacuation

Effluent Treatment

Trolley Mounted Pumps for Pit Evacuation

Molasses Transfer upto 5 kms

Flocculant Dosing

Lime Sucrate

BSCIC JAS-ANZ ISO 9001 REGISTERED

International Quality:

Headquartered in Kanpur, India, Risansi Industries Ltd manufactures and globally markets progressing cavity pumps and magma massecuitte pumps for delivering low to high viscosity, aggressive and abrasive media. We also manufacture online blinds / actuators / hammer blinds for the petroleum industry. With a dense network of subsidiaries, branch offices and agencies, we are being represented successfully across the globe. ISO 9001 certification since the last 20 years reinforces our focus on quality.

WHY SELECT RISANSI

1. More than 40 years' experience in sugar, distillery & refinery industry
2. ISO 9001:2008 certified
3. Original Equipment Manufacturer
4. Quality material at affordable rates
5. Huge inventory stocks
6. Prompt after sales service
7. Regular visits to each mill

ADVANTAGES OF USING RISANSI HIGH FLOW PUMPS

1. Our screw pumps can handle all types of viscous media including abrasive slurries.
2. Simply constructed and easy to dismantle and assemble
3. Low downtime losses.
4. Low power consumptions and operating costs
5. Available with various seals and drive systems combinations.
6. Online stator maintenance can be done in 2 minutes
7. Eccentric joint maintenance in 5 minutes.

ADVANTAGES OF USING RISANSI ZERO LEAK ROTA PUMPS

1. The standard Risansi Rota pumps are excellent for handling Magma/Massecuitte in sugar industry and any other highly viscous liquids.
2. Leak proof: Standard mechanical seal with hardened Tc vs Tc faces/metallic faces provided on drive shaft and the flap, providing zero leakage.
3. The standard ROTA pump has an area contact; implying longer life, plus a replaceable GM/BRONZE tip.
4. It is also capable of giving a positive displacement to many other highly viscous liquids.

INSTALLATIONS

Installation in Gujarat

Installation in Senegal

Installations in Thailand

Installations in Uganda

Installations in Kenya

Installation in Vietnam

Major Clients

- Avant-Garde Engineers & Consultants Pvt. Ltd.,
- ISGEC Heavy engineering Ltd.,
- Fives Cail- KCP Limited
